

SitaPBX

IP PBX SERVER

IP PBX Server is a server based IP PBX that run on Asterisk software to connect to other telephone services of both public switched telephone network (PSTN) and Voice over Internet Protocol (VoIP) services

Sita Network is a fully integrated Business Solutions Provider (5S). Our goal is to assist our customers with the latest cost-effective technologies, enabling them to retain focus on their operation. We are committed to integrate our customers' businesses with technologies for tomorrow, enabling them to focus better on their Business.

Branded Server

FEATURES

- Using the GNU General Public License (GPL) on a Linux OS that does not require software licenses.
- The Asterisk software includes many features available in proprietary PBX systems: voice mail, conference calling interactive voice response (phone menus), and automatic call distribution.
- Allow 3rd party add-ons
- Customisable
- Scalable with HA, DR

Asterisk Software **

Asterisk is the #1 open source framework for building communications applications. Asterisk powers IP PBX systems, VoIP gateways, conference servers and other custom solutions. There are more than one million Asterisk-based communications systems in use, in more than 170 countries. Asterisk is used by almost the entire Fortune 1000 list of customers. Most often deployed by system integrators and developers, Asterisk can become the basis for a complete business phone system.
